## 20. Urine leakage which is usually a full void

**FUNCTIONAL URINARY INCONTINENCE** (disability associated urinary incontinence)

In 2019, the International Continence Society defines disability associated urinary incontinence as the complaint of urinary incontinence in the presence of a functional inability to reach a toilet/urinal in time because of a physical impairment, (e.g. orthopaedic, neurological) and/or mental impairment. (D'Ancona CD et al, 2019)
